- 6. In general, the cargoes of SOVROM tugs were as follows; barges leaving Vienna carried gasoline, engine oil, vehicles (type and make unknown), and machinery parts for vessels (type and make unknown), which were destined for Reni, USSR; barges leaving Bratislava carried rugar, trucks and jeeps (make unknown) also destined for Reni; from Komarom and Komarno barges carried cargoes of pyrite and bauxite bound for Reni, and sugar and cereals bound for Hungary; for Reni. From Turnu-Severin upstream to Vienna, the barges were generally empty, but occasionally they transported cereals to
- 7. On the downstream trip to Sulina, gasoline was sometimes unloaded at Almafisztes, Hungary. This gasoline was then reloaded and transported to Remi.

 Almafisztes to somewhere in the USSR,

- The SDGP tugs belonged to a Soviet transport company and had been confiscated from Rumania, Hungary, Czechoslovakia and Austria. This company had offices in all Danube ports. The Meszart Company was a Hungarian-Soviet transport company operating on the Vienna-Remi route. The CSP was a Czechoslovakian-Soviet transport company which operated on the Vienna-Remi route, and the DDSG Company was an Austrian-Soviet transport company also operating on the same route.
- 9. Soviet-controlled vessels on the Damube did not load or unload cargo in Yugoslav ports, and Yugoslav vessels operating on the Yugoslav-Vienna route did not load or unload in Hungary and Czech-oslovakia.
